

Office of Response and Restoration Watershed Database and Mapping Project Feedback Form:

Thank you for taking the time to answer some brief questions regarding this watershed project. This product is part of an ongoing effort in San Francisco Bay and similar products are available in other watersheds across the country. Your comments and suggestions will help us support your local needs in addition to our mission goals.

INSTALLATION AND USAGE

YES NO

Did the AutoRun menus appear and function correctly?

Were the AutoRun screens intuitive?

Did you encounter any problems during installation?

Were the instructions clear?

If this product were developed on a DVD, could you use it?

HTML GUIDE

Did the Watershed Guide install properly?

Did you find the Watershed Guide background information useful?

Did you find the Watershed Guide application instructions useful?

QUERY MANAGER DATABASE/MARPLOT MAPPING APPLICATION

Did the applications, maps, and data install properly?

Did both Query Manager and Marplot function after the install?

Did Query Manager and Marplot open to San Francisco Bay?

Were you able to query the data?

Was the documentation about QM and Marplot helpful?

ARCVIEW GIS PROJECT

YES NO

Did you install the ArcView GIS project and data?

Did the ArcView project open up without errors?

Does the project take up too much hard-drive space?

**Office of Response and Restoration Watershed Database and Mapping
Project Feedback Form:**

ARCVIEW GIS PROJECT CONTINUED...

YES NO

Are the Chapters and Libraries intuitive (or well explained)?

Did you find the custom extensions useful?

Is your use of the data limited by it being in ArcView 3.X

Do you have the capability to reproject and transform
shapefiles/imagery/grids if necessary?

Do you know of data sources that could be added to the project?

Would a web-based Watershed Project be a preferred option for you?

Additional Comments:

Please email this form to: cprd.watersheds@noaa.gov or Fax (206.526.6865) to us
so that we can incorporate your comments and program needs into the next release
or update to the San Francisco Watershed Database and Mapping Project.

Thank You,

The CPRD GIS Team
